OBJECTIVE

Detail-oriented B.Tech (AI & Data Science) undergraduate with a strong foundation in Python, C/C++, data structures, web development, and machine learning. Seeking to apply analytical and technical skills to build efficient, data-driven, full-stack solutions.
Coursework: DSA, AI, Cloud Computing, Machine Learning, Full Stack Development, Computer Networks, Operating Systems, Database Management Systems, OOPS.

EDUCATION

Expected 01/2028

KIT - Kalaigarnar Karunanidhi Institute of Technology, Coimbatore, Tamil Nadu, India

B.Tech in Artificial Intelligence & Data Science | **CGPA: 8.00**

EXPERIENCE

Full Stack Developer Intern, Arumexa Technologies (offline)

May 2026 - Jun 2026

Madurai, India

Designed and developed a School Resource Management (SRM) System to streamline academic and administrative operations for educational institutions.

Contributed across the full product development lifecycle — requirement analysis, UI/UX design, frontend development, backend integration, and database management.

PROJECTS

SaaS Platform [Next.js, MERN Stack, Cloud Services]

March 2026

- Developed subscription and service management functionality for managing user-based services.
- Built scalable frontend and backend components using Next.js, React, Node.js, Express, MongoDB, and Mongoose. Integrated cloud-based deployment and services to support reliability, scalability, and production-ready application delivery.

ATLYX - Learning Management System [Next.js, MongoDB, React, Next.js API / REST APIs]

June 2026

- Built a Coursera-inspired, admin-manageable LMS supporting course management, student enrollment, progress tracking, and interactive learning experiences. (Freelancing)
- Implemented course creation and management, student enrollment, progress tracking, and interactive learning features to support the complete learning workflow.
- Designed a responsive and user-friendly interface with scalable components and role-based administrative functionality.

Ai-Application-Assistant [Next.js, React, TypeScript, Prisma, PostgreSQL, Browser Extension, AI Automation]

August 2026

- Built a full-stack AI job application assistant integrating a Next.js platform with a browser automation agent for intelligent form detection, field mapping, autofill, and multi-page application workflows.
- Implemented persistent profile learning, field-mapping memory, user-scoped resume storage, automatic resume attachment, and reusable application answers using Prisma/PostgreSQL.

EyeNav AI-Powered head & Eye control [Python, MediaPipe Face Mesh, OpenCV, WebSocket, Android, IoT]

August 2026

- Developed an assistive computer-control system using Python, OpenCV, and MediaPipe Face Mesh to track facial landmarks, nose position, eye movements, blinking, and head direction through a webcam.
- Implemented a real-time command engine with event normalization and debouncing to convert head gestures and blink events into actions such as cursor navigation, selection, volume control, and media navigation.

TECHNICAL SKILLS

CERTIFICATIONS

- Python
- MERN Stack
- GitHub
- Java
- DBMS
- Wordpress
- HTML/CSS
- UI/UX Designing
- JavaScript
- Stitch / Figma

CISCO - Python Essentials	2025
CISCO -Cyber Security	2025
Coursera - Artificial Intelligence Essentials	2025
IBM SkillsBuild - Career Management Essentials	2025
NPTEL- Introduction to Java (Gold + Elite)	2026

COMPETITIVE PROGRAMMING & ACCOMPLISHMENTS

LeetCode : Max rating 1338 . 600 + problems solved . Top 94.4% globally

Codechef : Max rating 1479 (2*) . 800 + problems solved

Global Platform Performance : 1400+ problems And Attended 120+ Contests in DSA

Inter-College Hackathon (24 hrs): Secured a Top 10 finish.

KIT Hackathon (36 hrs): Completed as part of a team.
