OBJECTIVES :

B.Tech Artificial Intelligence and Data Science student with strong skills in Data Structures, Algorithms, Python, C++, and Full-Stack Development. Passionate about AI, Cloud Computing, and Software Engineering, with experience in internships, freelance projects, and competitive programming.

SKILLS :

- | | | |
|---------------------------|------------------|--------------------|
| - Python , Java , C++ , C | - RAG | - Machine Learning |
| - Cloud Computing | - Docker | - HTML / CSS |
| - GITHUB | - DBMS | - JavaScript |
| - Automation (n8n) | - UI / UX Design | - MERN STACK |

EXPERIENCE :

- Completed a 1-Month Cloud Computing Internship at Finest Coder with exposure to AWS, Linux, and Networking.
- Worked as a Python & C++ Developer Intern at Cognifyz Technologies on development tasks.
- Gained 8+ Months of Freelance Experience delivering web and software solutions.
- Successfully delivered 10+ client projects with a focus on quality, performance, and timely delivery.

EDUCATION :

B.Tech – Artificial Intelligence and Data Science
KIT - KalaignarKarunanidhi Institute of Technology, Coimbatore
CGPA: 8.92
Expected Graduation: 2028

PROJECTS :

Data Guarding : Tech Stack - (NEXT.JS)

Built a property management system to handle listings, ownership, and transactions . Designed efficient backend logic for data management and workflow automation . Ensured data consistency, security, and smooth user operations.

Advanced Intrusion Detection System : Tech Stack - (Python, Flask, React, MongoDB, XGBoost)

Developed an AI-powered intrusion detection system for real-time threat detection and network monitoring. Implemented machine learning models for attack classification and anomaly detection. Built a live dashboard with analytics, alerts, and automated security responses.

Data Securer : Tech Stack - (MERN STACK + Blockchain)

Designed a system to ensure secure storage and protection of sensitive data . Implemented data integrity checks and basic encryption techniques . Focused on reliability and security in data handling processes

Student Performance Tracker : Tech Stack - (Python , Stream lit , kaggle Datasets)

Developed a machine learning model to analyze and predict student performance . Performed data preprocessing, visualization, and model training . Provided insights to support academic improvement decisions.

Direct Property - Tech Stack : MERN Stack

Developed a secure agricultural data management system to replace manual record-keeping . Improved data integrity, automation, and workflow efficiency for farmers and stakeholders . Designed structured storage and retrieval for reliable data handling.

ATLYX - Tech Stack : NEXT.JS

Developed a user-friendly and admin-manageable Learning Management System (LMS) inspired by Coursera using Next.js. Enables seamless course management, student enrollment, progress tracking, and interactive learning experiences.

CERTIFICATIONS :

- | | |
|---|--|
| - JAVA Programming in NPTEL (ELITE + Gold | - HTML , CSS , JavaScript - Coursera |
| - Problem Solving in C – NPTEL | - DBMS Course in NPTEL (ELITE) |
| - Python Essential (1 & 2) Courses in CISCO | - Operating System Foundations Course in CISCO |

ACCOMPLISHMENTS :

- Data Guardian project selected by the Vidhya Incubation Center for patent filing and innovation support.
- Achieved Division 3 ranking on CodeChef.
- Secured 1400+ rating on CodeChef / 1700+ rating on LeetCode / 1000+ rating on Codeforce
- Ranked Top 15 among 400+ students in college-level competition
- Solved 1400+ coding problems across LeetCode, CodeChef, and Codeforces.
- Participated in 150+ global competitive programming contests

DECLARATION :

I hereby declare that the information provided in this resume is true and accurate to the best of my knowledge.
